

Dies, Blocks, Foil & Toolings

Technoshell: A Complete solution for all your stamping needs

Technoshell manufactures a wide range of Hot Foil Stamping Machines. In order to get excellent stamping results; Dies, Blocks, Rollers and Foils have an important roll to give the desired results.

We offer Jigs, Fixtures, Foils, Stamping Blocks, Dies, Rollers and other related accessories to provide a “One Stop Solution” to all your stamping needs.

Hot Stamping Dies and Blocks:

■ Silicone Rubber Dies:

To make your products very attractive & stand out on the shelves, we at Technoshell are always striving to support you with the finest hot stamping dies and blocks

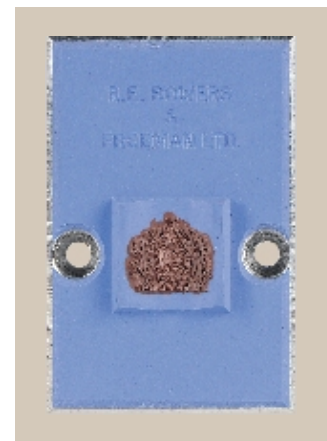

To further strengthen our capabilities for offering world class dies & blocks we have established an association with R.E. Bowers & Freeman Ltd, UK who have more than 60 years experience of producing excellent Dies, Blocks, Punches, Coding Boxes etc.

The contoured dies produced by us are very suitable for articles which have three dimensional surfaces.

Our high definition dies are capable of printing thin lines & shapes, giving a very rich look to the articles.

In order to compensate for small variations in the articles, we offer dual hardness dies which gives sharp printing images & also takes care of the small variations.

■ Silicone Rollers:

Silicone rubber rollers are the most preferred choice for applying decorative bands on caps & closures. These rollers can be coreless or having cores of steel or aluminium.

■ Metal Dies:

- Hot stamping dies for graphic applications
- Embossing dies
- Digit wheel printing dies

Foil cutting machine

FC-600

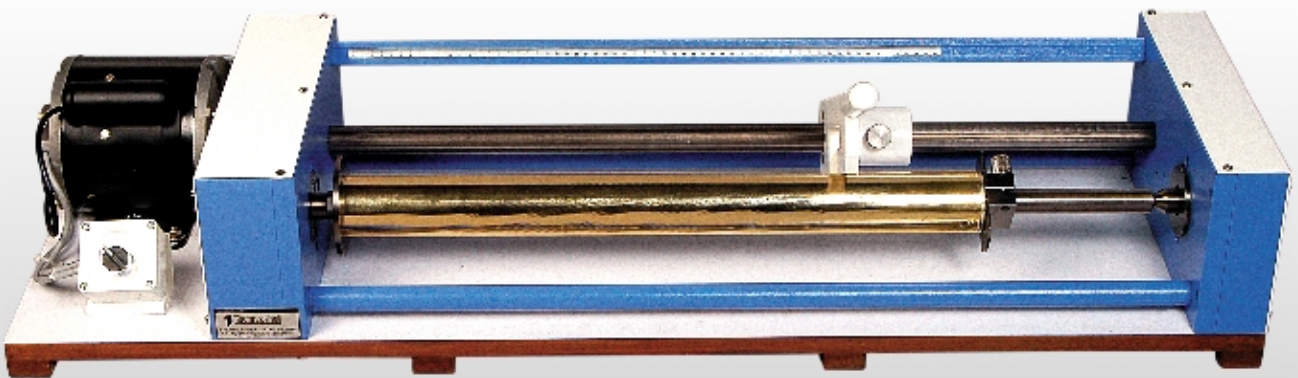

Features

- Simple and rugged construction
- Easy loading and removal of the roll
- Cutting thin slice is possible
- Fully enclosed drive unit for safety

Technical Specifications

- Motor : Single phase 1/4 Hp.
- Roll length : 640 mm
- Core dia : 25 mm
- Slice width : 5 mm Minimum
- Max. Roll dia : 100 mm
